Fluid.Internals.Collections.Tensor

1 Operator $+$

```
public static Tnr operator +(Tnr tnr1, Tnr tnr2)S
```

Takes two tensors of equal rank and returns a new tensor that is a sum of the two. The resulting tensor has no superior, it must be set manually after the operation. Usage:

```
var tnr1Vals = new int[] {5,4, 9,7,  0,8, 2,1};
var tnr1Struc = new int[] {2,2,2};
var tnr1 = TnrInt.FromFlatSpec(tnr1Vals, tnr1Struc);
var res = tnr1 + tnr2;
```
